Vinay Saini

Lead Software Engineer — .NET Full-Stack Developer

vnyseny | in/vnsyseny | vnyseny@gmail.com | +91-7015834371

Summary

Lead Software Engineer and .NET Full-Stack Developer experienced in designing, developing, and modernizing enterprise applications across insurance and financial services. Hands-on experience with .NET 10, ASP.NET Core REST APIs, SQL Server, MongoDB, Elasticsearch, Amazon Athena, Kafka, Redis, and AWS containerized deployments using ECS. Experienced in integrating insurer REST and SOAP services, evolving distributed applications, and migrating legacy .NET Framework applications hosted on IIS on AWS EC2 to modern .NET APIs. Focused on application design, maintainability, reliability, and delivering business-focused features.

Education

- **Kurukshetra University, Kurukshetra** *2017 - 2021*
  Bachelor of Technology (Computer Science and Engineering) Percentage: 78
- **Govt. Polytechnic Sonipat** *2012 - 2015*
  Polytechnic Diploma (Electrical Engineering) Percentage: 60
- **Board of School Education Haryana, Bhivani** *2012*
  Class 10th Percentage: 84

Technical Skills

Languages: C#, SQL, JavaScript, TypeScript, Python, HTML, XML
.NET Technologies: .NET 10, ASP.NET Core, .NET Framework, Web API, RESTful APIs, SOAP, MVC, Entity Framework, LINQ
Databases, Search & Analytics: SQL Server, MongoDB, Elasticsearch, Amazon Athena
Messaging & Caching: Apache Kafka, Redis
Cloud & Hosting: AWS ECS, AWS EC2, IIS, containerized deployments
Frontend: Next.js, React, Angular, Blazor, Bootstrap, jQuery
AI-Assisted Development Tools: OpenAI Codex, Cursor, GitHub Copilot, Kiro, ChatGPT, Google Gemini
Tools: Visual Studio, VS Code, Git, GitHub, Azure DevOps, Serilog
Core Strengths: Application Design, Distributed Systems, Legacy Modernization, API Integration, Technical Leadership, Code Reviews, Performance Optimization

Work Experience

- **Policybazaar Insurance Brokers Private Limited, Gurgaon** *Apr 2026 - Present*
  Lead Software Engineer
  - **Application Architecture:** Established and evolved application architecture and development conventions for .NET Core applications, making the codebase more developer-friendly, maintainable, and easier to extend.
  - **Feature Engineering:** Lead application design and develop new features for insurance technology workflows, translating business requirements into maintainable full-stack solutions with a focus on reliability and long-term supportability.
  - **Distributed Systems:** Develop services using **.NET 10 / ASP.NET Core**, **SQL Server, MongoDB, Elasticsearch, Amazon Athena, Kafka, and Redis** to support application data, search and analytics, asynchronous messaging, and caching.

- **AWS Hosting:** Build and support containerized applications deployed on **AWS ECS**; maintain and modernize legacy .NET Framework applications hosted on **IIS on AWS EC2**.
- **Legacy Modernization:** Migrate legacy .NET Framework functionality into modern .NET RESTful APIs, enabling incremental modernization while supporting existing business operations.
- **AI-Enabled OCR:** Developed a Python-based OCR solution to extract information from customers' existing insurance policies during policy-portability journeys, reducing manual data entry and helping simplify complex forms.
- **Integration Management System (IMS):** Designed and developed a web-based **ASP.NET Core MVC** internal management application with modules for maintaining application configurations and parameters at runtime.
- **Payment and Logging Improvements:** Migrated the payment service module and redesigned the application logging approach to improve robustness and support more efficient diagnostics.

- **Policybazaar Insurance Brokers Private Limited, Gurgaon** *Sep 2024 - Mar 2026*
  Senior Software Engineer

  - **Insurer Integrations:** Integrated external services from multiple insurers through both **REST APIs and SOAP web services**, connecting insurer capabilities with internal insurance workflows.
  - **Full-Stack Feature Development:** Developed new application features across backend services and frontend components, contributing to end-to-end delivery of insurance product capabilities.
  - **Legacy Application Support:** Worked across modern .NET services and the existing .NET Framework application estate, supporting enhancements, troubleshooting, and gradual modernization.

- **Surya Software Systems Private Limited, Bengaluru** *Jan 2022 - Sept 2024*
  Software Development Engineer

  As a Software Development Engineer at Surya Software Systems Private Limited, I play a key role in software development using **ASP.NET(C#)** and **.NET Core(C#)**. My responsibilities include:

  - **Gathering Client Requirements:** Collaborated closely with clients to understand their needs and translate them into detailed technical specifications.
  - **Technical Documentation:** Prepared comprehensive technical specifications to guide development processes.
  - **Dynamic Web Forms Development:** Designed and developed dynamic web forms for efficient data input and user interaction using ASP.NET technologies.
  - **Code Optimization and Bug Fixing:** Optimized code for performance, resolved complex bugs, and ensured seamless deployment across multiple environments.
  - **Analytics and Reporting:** Developed sophisticated analytics reports to facilitate data analysis and visualization for informed decision-making.
  - **Full-Stack Development:** Led both backend and frontend development efforts, ensuring the creation of robust, scalable, and responsive solutions.
  - **Team Leadership and Mentorship:** Provided leadership within the team, mentoring junior developers and guiding them through project challenges.
  - **Project Migration and ETL:** Managed project migrations and ETL processes, ensuring smooth transitions, data integrity, and efficient processing.
  - **Deployment Management:** Managed the deployment of applications using IIS, ensuring reliable and secure hosting in a production environment.
  - **Projects:** Contributed to key projects including PFS (Planning and Forecasting System), FTP (Fund Transfer Pricing), BASEL, Risk Aggregator, RControl, BALM (Bank Asset Liability Management), and IA (Income Analysis).

Projects

- **Bloggie** *Link to Demo*
  Bloggie is a blog application, offering a platform for users to create, edit, and publish blog posts.

  - The application was developed using the **ASP.NET Core MVC** framework.
  - **Designed** and implemented the **database schema** for the blog application.
  - Developed the **front-end** and **back-end** functionality for creating and managing blog posts.

- The application allows registered users to manage their posts and comments with **Authentication**.
- Utilized **Entity Framework** Core for data access and **SQL Server** for database management.
- Employed **Razor** syntax for dynamic content rendering and **Bootstrap** for front-end styling.
- Integrated user authentication and authorization features using **ASP.NET Core Identity** for secure access.

- **Attendance by Face Detection**
  Transforming attendance management through advanced face detection technology.
  - Developed a sophisticated face recognition system in **Python** using the **OpenCV**, **NumPy**, and **face_recognition** libraries.
  - The system is capable of detecting **human faces** in **images** and **video streams** using **OpenCV**, storing and comparing facial encodings using **NumPy arrays** for efficient processing.
  - Leveraged the face_recognition library to access a **pre-trained** model for recognizing human faces with high accuracy.
  - Employed NumPy for storing and comparing facial encodings, ensuring fast and reliable face recognition.
  - Implemented a user-friendly interface for displaying detected faces
